Abstract

This study aims to determine the Evaluation of Village Fund Management in Improving Physical Development Based on Village Rpjm. This research is descriptive quantitative, the sampling technique uses purposive sampling, the subject of this research is the place where the research was conducted, namely Putri Puyu District, data collection was carried out by observation, interviews and documentation. The results of this study indicate that the village government in managing village funds for physical development has 7 stages, namely: budgeting, allocation, administration, accountability, reporting, distribution, use, monitoring and evaluation and termination/postponement. Village funds managed in Tanjung Pisang Village, Tasik Putri Puyu District, are funds sourced from the APBN (State Revenue and Expenditure Budget) which are transferred through the Meranti Islands Regency Regional Revenue and Expenditure Budget. The Village Fund budget received by Tanjung Pisang Village for 2020, 2022 and 2022 is Rp. 4,861,491,600 which is used to finance government, development, community development and empowerment as well as village capital participation (BUMDes).
