SMART WELDING TABLE IN THE MARINE ENGINEERING
WORKSHOP***

Name : Rezki Arasyi

Student Identity Number : 1103201180

Supervisor I : Pardi, S.T.,M.T

ABSTRACT

“Technological developments are currently advancing rapidly. This is caused by human thinking which wants perfection and practicality. There are many conveniences and innovations that occur in every device used today. One of them is a wearable device. "This device is equipment that is installed on the user's body (such as watches, bracelets, necklaces, etc.) which has an operating system in it that can connect to the internet and other electronic devices such as mobile phones and tablets to obtain information on the device.”

Keywords: Monitoring, Camera CCTV, PC, Smartphone
