Abstract

This study aims to analyze and improve the financial management of madrasahs through the implementation of relevant applications. The research method used is descriptive with a qualitative approach, involving data collection through interviews, observations, and document studies. The results of the study indicate that the use of EDM and E-RKAM applications can enhance accountability and transparency in the financial management of madrasahs. Additionally, these applications assist in more effective financial planning and reporting. This research is expected to contribute to madrasahs in improving the quality and performance of financial management, as well as serve as a reference for future researchers interested in similar topics.
