ABSTRACT

The creation of an information book about Bengkalis State Polytechnic involved systematic steps to produce a quality and informative product. The process began with the collection of comprehensive data covering the history, study programs, facilities, and career prospects of the institution. This data was integrated into an attractive and easy-to-read book design. The draft book was then evaluated and revised based on feedback to ensure accuracy. The final book contains 40 pages in English and Indonesian, providing a complete guide to Bengkalis State Polytechnic. The information book about Bengkalis State Polytechnic was designed to provide in-depth insight into the history, study programs, and facilities available on campus. With many people still unaware of Bengkalis State Polytechnic, this book aims to promote the institution to people who have difficulty accessing the internet as well as international visitors. This book displayed in several public libraries in Bengkalis and Riau to ensure that information about the campus can be accessed more widely, so that the public not only knows the name but also gets more complete information about Bengkalis State Polytechnic.
