Abstract

The title of this final project is “Planning and Manufacturing of Chocolatos Goreng “3B” Business (Production Aspect Review)”. The general objective of the project is to find out how to plan and manufacture a Chocolatos Goreng “3B” Business. The specific objectives to be achieved in this final project are to find out the raw materials used, how the production process is, as well as to find out the constraints and solutions in producing Chocolatos Goreng “3B” Business. There are 4 implementation methods used in this project, namely, plan preparation, implementation, completion, and project reporting. The end result of this project is to produce a new product, namely snacks made from Chocolatos and spring roll skins. The production process is a type of continuous production process. The obstacle faced is that it is difficult to separate the spring roll skins one by one and it takes time, because the quality of the spring roll skin is not good and it tears easily, the solution is to buy a quality spring roll skin and when separating the spring roll skin it must be done carefully. The problem with the Chocolatos frying process is that the spring roll skin that has been rolled up with Chocolatos opens during the frying process. The solution is when frying, slowly place the Chocolatos into the pan and place the Chocolatos in half of the oil in the pan. during the frying process, the solution is when frying put the chocolatos into the skillet slowly and place the chocolatos in a half portion of the oil in the pan.

Keywords: *Planning, Production, Business, Chocolatos, Spring Roll Skin.*
