## ***ABSTRACT***

*The Maliques kos is one of the boarding houses in Bengkalis Regency, The Maliques kos accepts boarding tenants manually, namely by carrying out the registration process which must come directly to the boarding location or register by contacting the boarding house owner using a cell phone, so that tenants are still difficult to register. Basically a boarding house is one of the most important needs for overseas children, such as students and workers. Therefore we need a boarding house tenant acceptance application at The Maliques boarding house based on the website, this application is designed to make it easier to accept boarding house tenants for boarding house owners and make it easier to register as a boarding house tenant at The Maliques boarding house. This application is designed to feature information on boarding tenants who have been boarding at The Maliques boarding house, registration of boarding house tenants, as well as information on whether or not to accept or reject a boarding house tenant. This application is designed using the PHP programming language with the CodeIgniter Framework and MySQL Database. Through this website, it will be easier for boarding house owners to collect data on boarding tenants and boarding tenant registrants in registering as boarding tenants at The Maliques boarding house. Based on the results of implementation testing, the Application for Accepting Boarding Tenants at The Maliques Kos-Based Website can help customers to place an order for boarding houses through the form already available in the application. This application also helps managers to process boarding data, and make the latest updates about empty boarding houses at The Maliques boarding house.*
