ABSTRACK

Department of Naval Architecture and Shipbuilding Engineering, Bengkalis State Polytechnic, which was founded in 2001, is one of the departments that provides opportunities for children from the region to pursue higher education in order to meet the needs of experts in the field of shipping engineering. Boats and serve the manufacture of new and repair of fiberglass-based boats and kayu boats

Trailer Boat is a vehicle or tool that has 2 or more wheels connected to a building that can be used commercially or non-commercially, so it is quite profitable for entrepreneurs or ship owners who want to use this Trailer Boat. Trailer Boats are designed to launch, pick up, carry and sometimes store vessels. The movable trailer boat makes it easy for boat owners to use it in hard to access places or over long distances.
