ABSTRACT

Saving and Loans The Sungai Nibung Village Owned Enterprise is a village business institution managed by the community and the government in an effort to strengthen the village economy, which was formed based on the needs and potential of the village that still uses records in the form of bookkeeping and Microsoft Excel assistance so that it is not well organized. This system was created to assist savings and loan management officers at the UED-SP BUMDes Sungai Nibung office to be well computerized, easily, and quickly using the rapid Application Development method. This application is made using the Laravel framework and the database uses MySQL, this application is made using the CodeIgniter framework and a database using MySQL, to improve the service of the deposit management process, report generation, recapitulation of deposit data, view deposit history, search for saving data more effectively and efficiently.

Keywords : RAD, Saving and Loans, MySQL, CodeIgniter.
