***ABSTRACT***

*Dieser Research aims to know the distribution of funds of zakat, infak and sedekah on the National Amil Zakat Body (BAZNAS) Bagansiapiapi Rokan Hilir district. In this case, the document, which supports the existence of the role of zakat, is contained in the Law Number 23 of 2011 on the management of the zakat. Diese Forschung ist a type of descriptive qualitative research using primary and secondary data sources. The method used in this study is qualitative. The method of Sampling in this Study is purposive Sampling. The informants in this study are the leaders of BAZNAS and the general public. Data collection techniques in this study are using observations, interviews and documentation. The results of this study show that in the distribution of funds for zakat, infak and sedekah on the National Amil Zakat Body (BAZNAS), Bagansiapiapi Rokan Hilir District Management is already effective, can be seen from some things among them: The zakat collected from the year increases, so that the impossibility also increases. Has played a role in increasing the impossible income (those who are entitled to receive zakat) in the form of distribution and business funds, so that zakat funds can be used for more productive enterprises and the presence of socialization in the society.*
