ABSTRACT

This study aims to analyze the financial performance of the Riau provincial government when viewed from the degree of Independence ratio for the 2018-2021 period, to analyze the financial performance of the Riau provincial government from the effectiveness ratio for the 2018-2021 period, and to analyze the financial performance of the Riau provincial government from the efficiency ratio for the period 2018-2021. 2018-2021. The research approach is in the form of a descriptive approach, namely research conducted by collecting and presenting data received from the Notes on Financial Statements (CALK) of Riau Province in the form of Budget Realization Report data which is quite clear for researchers to analyze and compare with existing theories. The results of the study show that the Independence Ratio that is still occurring is due to the inability of the Regional Government of Riau Province in increasing Local Own Revenue so that the Provincial Government of Riau is dependent on the central government, while the PAD Effectiveness Ratio is said to be already good because the Provincial Government of Riau capable of achieving the target for local revenue, and for the Efficiency Ratio it is said to be still bad because the Riau Provincial Government has not been able to reduce the amount of regional spending.
