

## **WEBSITE BASED APPLICATION OF BENGKALIS STATE POLYTECHNIC STUDENT CAREER APPLICATION**

*Student Name* : Ansyari Adima Putra  
*NIM* : 6103201399  
*Supervising Lecture* : Desi Amirullah, M.T

### **ABSTRACT**

*Bengkalis State Polytechnic is the only Vocational State University in Riau under the auspices of the Ministry of Education and Culture. This is why graduates have to work on their own to find and look for job openings, and it takes time to get a job according to their area of expertise. Information on Polbeng job openings is shared through social media, such as Instagram, which is posted by the Career Support and Entrepreneurship Academic Support Unit (UPAPKK). To overcome this problem, a Website-Based Bengkalis State Polytechnic Student Career Application was built. This application is made using the PHP programming language using the Laravel framework and MYSQL, which is used for database system management. Application testing is carried out using Black box testing, where each feature is tested based on a different User side, such as the admin side, company side, and alumni side. Application testing is carried out to test the features available in the application and ensure that it runs successfully and is as desired.*
