

CHAPTER I

INTRODUCTION

1.1 Background of the Project

Politeknik Negeri Bengkalis has long stood as a bastion of advanced educational development in Bengkalis, Riau. As part of its commitment to fostering the academic and social growth of its students and the community, the institution will be organizing a culinary and MSME (non-culinary) Expo Project. The culinary and MSME expo project reflects a commitment to introduce a variety of local products and support the development of small and medium businesses. The event will serve as a platform for MSME players to showcase their products, both in the culinary and non-culinary fields. The culinary bazaar that will also be organized is expected to broaden people's knowledge about various regional culinary specialties and unique MSME products.

The tenant chosen to be part of this expo project is Leccata Caffe And Resto, a cafe located on Jalan Antara, Bengkalis, Riau. This cafe has been actively operating for more than a year. The decision to choose Leccata Caffe And Resto as a tenant in this project is based on careful consideration related to the success of this cafe in attracting public interest since its establishment. With a relatively short operational time span, Leccata Caffe And Resto has been able to build a strong reputation in local circles, attracting customers with a variety of offers and services offered. As such, Leccata Caffe And Resto's presence at the expo is expected to contribute significantly to enriching the visitor experience and adding value to the overall event.

The selection of Leccata Caffe And Resto as one of the tenants in this expo was based on several strong reasons. First, having been part of the cafe's work team, I have a deep understanding of the operations and quality of the products offered by Leccata Caffe And Resto. Second, the café has demonstrated a high commitment to customer satisfaction, so it is believed that it can provide a pleasant experience for expo visitors. Third, the coffee drinks offered by Leccata Caffe And Resto can be the main attraction for visitors who want to unwind after traveling around the

expo. Fourth, Leccata Caffè And Resto has become part of my job, so I have a good relationship with the manager and can ensure the cafe's participation in the expo runs smoothly. Fifth, the café's good reputation among the Bengkalis community is expected to attract more visitors to the expo.

Overall, the Culinary and SME Expo Project at Politeknik Negeri Bengkalis aims to create an event that is educational, recreational, and profitable for all parties involved. Through culinary exhibitions and bazaars, as well as non-culinary SME product exhibitions, and other exhibitions, the expo is expected to introduce various local products to the community, and encourage their interest in the business world. With the participation of tenants such as Leccata Caffè And Resto, the expo also aims to provide a more diverse and enjoyable experience for visitors. The success of this expo is expected to set an example for similar events in the future, and support the development of the culinary industry and local SMEs in Bengkalis.
