## **ABSTRACT**

*The docking process is one of the service activities at PT. Usda Seroja Jaya ship yard and Shipping. All employees and staff are expected to be able to provide good service so that the docking process can run smoothly so that it can be completed according to the specified time. Ship documents are documents that must be owned and must be on board the ship. These documents state the perfection of the ship in various functions or certain fields. The purpose of this study is to find out what needs to be prepared for the docking process and what are the obstacles that arise in the process of implementing ship docking at PT. Usda Seroja Jaya Ship Yard and Shipping. The formulation of the problem in the study is what needs to be prepared for the docking process and what are the obstacles that arise in the process of implementing ship docking at PT. Usda Seroja Jaya ship yard and Shipping. The data collection method was obtained by conducting observations, interviews and documentation. Then analyzed qualitatively with descriptive description. The results of the research are that preparation begins with an initial inspection of the condition of the ship and submission of a docking request to the shipyard and Main Obstacles Several obstacles that often occur come from shipyard technicalities which often find additional damage beyond estimates, bad weather that hinders work in the field, new regulations from KSOP, which can delay the process due to additional documents or procedures.*
