## **ABSTRAK**

Pencapaian *Sustainable Development Goals* (SDGs) Desa menuntut adanya tata kelola pemerintahan desa yang baik, transparan, dan partisipatif. Prinsip *Good Governance* menjadi fondasi penting dalam memastikan bahwa proses perencanaan, pelaksanaan, dan evaluasi pembangunan desa berjalan secara efektif dan berorientasi pada kesejahteraan masyarakat. Penelitian ini bertujuan untuk menganalisis penerapan prinsip-prinsip *Good Governance* serta mengidentifikasi faktor pendukung dan hambatan dalam pencapaian SDGs Desa di Kecamatan Bantan, Kabupaten Bengkalis. Penelitian ini menggunakan pendekatan kualitatif dengan metode deskriptif analitis. Kajian teoritis berlandaskan konsep *Good Governance* yang meliputi prinsip transparansi, akuntabilitas, partisipasi, responsivitas, dan integritas aparatur desa, serta konsep SDGs Desa sebagai kerangka pembangunan berkelanjutan di tingkat lokal. Pengumpulan data dilakukan melalui wawancara mendalam, observasi lapangan, dan dokumentasi pada tiga desa, yaitu Desa Selat Baru, Desa Muntai, dan Desa Resam Lapis. Hasil penelitian menunjukkan bahwa penerapan prinsip *Good Governance* di ketiga desa secara umum telah berjalan cukup baik, terutama dalam aspek perencanaan pembangunan, keterbukaan informasi, integritas aparatur desa, serta keterlibatan masyarakat dalam musyawarah desa. Namun demikian, masih ditemukan sejumlah hambatan, seperti keterbatasan kapasitas aparatur dalam pengelolaan sistem digital, kompleksitas regulasi, kendala teknis pendataan SDGs Desa, serta belum meratanya partisipasi masyarakat. Penelitian ini menyimpulkan bahwa penerapan prinsip *Good Governance* berperan signifikan dalam mendukung pencapaian SDGs Desa, namun memerlukan penguatan kapasitas kelembagaan, optimalisasi pemanfaatan teknologi, serta strategi peningkatan partisipasi masyarakat agar pembangunan desa dapat berlangsung secara berkelanjutan.

***ABSTRACT***

*The achievement of the Village Sustainable Development Goals (Village SDGs) requires the implementation of good, transparent, and participatory village governance. The principles of Good Governance serve as a fundamental foundation to ensure that village development planning, implementation, and evaluation processes are carried out effectively and oriented toward community welfare. This study aims to analyze the implementation of Good Governance principles and to identify the supporting and inhibiting factors in achieving the Village SDGs in Bantan Subdistrict, Bengkalis Regency. This research employs a qualitative approach with a descriptive-analytical method. The theoretical framework is based on the concept of Good Governance, which includes the principles of transparency, accountability, participation, responsiveness, and the integrity of village officials, as well as the Village SDGs concept as a framework for sustainable development at the local level. Data were collected through in-depth interviews, field observations, and documentation in three villages, namely Selat Baru Village, Muntai Village, and Resam Lapis Village. The findings indicate that the implementation of Good Governance principles in the three villages has generally been carried out satisfactorily, particularly in aspects of development planning, information transparency, the integrity of village officials, and community involvement in village deliberation forums. However, several challenges remain, including limited capacity of village officials in managing digital systems, regulatory complexity, technical constraints in Village SDGs data collection, and uneven community participation. This study concludes that the implementation of Good Governance principles plays a significant role in supporting the achievement of the Village SDGs. Nevertheless, it requires strengthening institutional capacity, optimizing the use of technology, and developing strategies to enhance community participation to ensure sustainable village development.*
